

To whom it may concern:I am a locksmith in North Carolina. I spend a lot of time in my work van. I have never been much of a radio listener, until I purchased an xm receiver earlier this year. I primary listen to realtime news channels. I've heard the xm was going to start offering local weather reports I think this would be great! There are a lot of people that are displeased with the fm stations and with the content of their moringing shows. Most of the time they are vulgar in content. I guess my point is that why should we have to listen to trash just to get the local weather report.
